

Although I do not live in an area that is directly affected by NAB's Petition 04-160, I felt it was important to contact you with my feelings on the matter of restricting satellite radio from broadcasting local weather and traffic in select cities. I feel that this would unfairly hurt the ability of satellite radio to compete with local radio, and should not be adopted. My daughter uses XM-Radio, and enjoys its programming, as well as it's convenience. Traffic reports would help her out as well, and she pays for the service. Please do not restrict the ability of satellite radio to offer local services such as these. Thank you,
Mark Capuano
